

# FrontEnd home.php

#### Before

#### After

#### Frozen 2

Ditetapkan tiga tahun setelah peristiwa film pertama, ceritanya mengikuti Elsa, Anna, Kristoff, Olaf, dan Sven vang memulai perjalanan melampaui kerajaan Arendelle mereka untuk menemukan asal mula kekuatan magis Elsa dan menyelamatkan kerajaan mereka setelah suara misterius memanggil Elsa

1 jam 43 menit

#### FORD V FERRARI

Berdasarkan kisah nyata yang luar biasa dari Carroll Shelby, seorang perancang mobil visioner dari Amerika bersama Ken Miles, seorang pembalap Inggris yang tak kenal takut. Mereka bersama-sama berjuang menghadapi campur tangan perusahaan, undang-undang fisika, dan masalah pribadi mereka sendiri ketika membangun mobil balap revolusioner bagi Ford Motor Company untuk menantang mobil balap buatan Enzo Ferrari yang mendomniasi 24 Jam Le Mans di Perancis pada tahun 1966.

2 jam 32 menit

#### Habibie Ainun 3

"Suatu hari, kita akan bertemu kembali dalam dimensi yang lain," ucapnya sambil menatap mata dan menggenggam tangan Habibie. "Saya merindukanmu," balas Habibie dalam bahasa Jerman. Setelahnya, adegan berganti tentang kehidupan Ainun yang bercita-cita meneruskan pendidikan di bidang kedokteran. Ainun menghadapi ragam tekanan tentang pilihan menjadi dokter yang dianggap sangsi untuk seorang wanita. "Perasaan sentimentil perempuan yang dibalut oleh indra perasa yang lebih tajam dari laki-laki membuat ilmu kedokteran tidak cocok," ujar seorang pria kepada Ainun. Namun, Ainun kemudian kukuh melanjutkan keinginannya atas dukungan Habibie dan sang ayah yang diperankan Lukman Sardi.

2 jam 12 menit

### Masih ingat box model?

• Setiap element HTML sebenarnya memiliki box yang dapat diatur. Adapun pengaturan box meliputi:

Top

margin-top

border-top

padding-top

Content

padding-bottom

border-bottom

margin-bottom

Bottom

CSS 'width'

Internet Explorer 'width'

Width

Height

Margin

Border

Padding

Background

#### SUNIQU IT

Contoh:

div { width: 320px; padding: 10px; border: 5px solid gray; margin: 0; }

#### Style#1

```
C: > xampp > htdocs > TIKUBackend > application > views > ♠ home.php
      <!DOCTYPE html>
      <head>
           <title>TIKU</title>
           <meta name="viewport" content="width=device-width, initial-scale=1.0">
           <!-- setting web responsive -->
           <style>
               body {margin: 0; /*batas*/}
               ul.navbar { /*unordered list dengan class navbar*/
                   list-style-type: none;

#### Latihan

- Setelah modul bayar tambahkan modul data\_diri:
  - Nama Lengkap
  - Umur
  - No KTP
- Gabungkan modul data\_diri beserta modul tiket
- Memberi redirect jika kursi kosong dengan session destroy
- Temukan fraud system dan perbaiki
